

Rainforest Live '97-'98

Through Rainforest Live, you and your class will join student researchers from The School for Field Studies in the heart of the Australian rainforest as they work to save a special habitat which shelters unique primitive plant species and marsupials found nowhere else on earth.

How does Rainforest Live help you meet your curriculum needs?

- ▶ Brings interactive learning to your classroom through *Queensland News* and Web site
- ▶ Supplements and enlivens your curriculum units on plant/animal biology, rainforests, and ecology
- ▶ Empowers students to work towards solutions to complex environmental problems in their own communities
- ▶ Introduces students to exciting and new careers in the field of science

Skills and Content

- food webs • rainforest ecosystems • biodiversity
- plant/animal classification • scientific processes
- conservation • cultural sensitivity • research methods

Special Introductory Price!

What do you get with Rainforest Live?

Queensland News

Every week for 12 weeks, you and your students will receive Journals written by student researchers describing life in the Australian rainforest, updates on their research, and Q&A between your students and students at the rainforest site.

Web Site

 at <http://www.sitesalive.com>

Designed to complement *Queensland News*, the Web site provides a multi-media platform which captivates students through photographs and audio of the Australian rainforest. You'll also find interactive activities and additional resources.

Teachers Guide

Provides everything you'll need to quickly and easily integrate Rainforest Live into your existing curriculum. You'll find hands-on projects which parallel studies at the site, background activities to familiarize students with rainforests, and detailed lesson plans.
